INTERNSHIPS AND EXPERIENCE

Creator and Product Owner - PayPo

Met and interacted with local vendors to understand their needs and ensure PayPo's compatibility with their existing systems

Designed the app structure according to the requirements of local vendors

Starlight internship - June 2024 - August 2024

Developer

Wat Is Dis App - June 2023- december 2023

Made an app for toddlers learning for a Dubai based firm internship

TedX Curator

Curated the speech for Ted talk of renowned photographer Mr Indraneel Shelar

closely coordinated and worked with him to create a speech for him for his Ted talk which eventually became the most liked talk amongst the whole TedxVit 2024 panel

PROJECTS

Kids E-learning app(game)

- Designed the UI for the app to make it catchy for young users
- Included multiple games for kids for their healthy screen time
- Used provider state management for managing application state efficiently
- Using builders and controllers to perform animations in the app
- Testing and debugging of the app by paying attention to the minute details
- Deployment on playstore and AppStore

Starlight video app

- App to stream videos for kids and parents
- Seperate UI for kids and parents with lock functionality for parents
- JWT token authentication and verification
- Login logout for each user with premium or not premium functionality
- Video player integration and using local storage for letting the access bypassing the logging in

Reward system app for local vendors

- An app that keeps the transaction records of sellers and buyers and creates a goal based reward system for the benefit of both buyers and sellers
- Creates a compelling incentive for buyers to make more purchases, benefiting sellers, while rewarding buyers for their tracked purchases that would otherwise go unrecognised and unappreciated.

Trends catcher app

- An app to let users catch the latest trends in the world around them and not go out of relevance
- Used different APIs to fetch data about top trending GenZ slangs, news, music, movies etc.
- Parsing of the JSON data fetched and then using it to render the app screen UI
- Using animations and advanced widgets for modern design

TECHNICAL SKILLS

- Programming Framework – Flutter
- Programming Languages – C++, Dart
- Programming Environment –Android Studio
- Data Technologies – Firebase

EDUCATION

Vidyalankar Institute of Technology, Wadala 2021-2025

Bachelor of computer engineering(CGPA)

Ruia Junior College, Matunga 2020

11th 12th grade junior college science

D.A.V public school, Thane 2018

10th Grade
